RAGUL S

Aspiring AI Engineer | AI & Data Science Undergraduate
Phone: +91 90420 20299 | **Email:** ragulsekar777@gmail.com
Madurai, Tamil Nadu, India | LinkedIn | GitHub

SUMMARY

Second-year B.Tech student in Artificial Intelligence and Data Science with hands-on experience in Python, backend development and computer vision. Built and deployed full-stack applications using Flask, REST APIs and PostgreSQL, and developed YOLOv8-based object detection systems. Seeking to grow as an AI Engineer through projects in Machine Learning and Computer Vision.

EDUCATION

B.Tech (AI & Data Science) - Sri Eshwar College of Engineering, Coimbatore | **CGPA: 8.5/10** **2025-Present**
HSC (Class 12) - MM Higher Secondary School, Madurai | **90.6%** **2024-2025**
SSLC (Class 10) - MM Higher Secondary School, Madurai | **90%** **2022-2023**

PROJECTS

Spark Desk - Hostel Complaint & Maintenance Platform | *Python, Flask, PostgreSQL, JavaScript* GitHub

- Developed a full-stack platform for students, wardens and administrators to register, track and resolve hostel maintenance issues.
- Built RESTful APIs in Flask for complaint creation, status updates, filtering and admin operations, with authentication and role-based access control.
- Integrated PostgreSQL with complaint categorization, search and real-time status tracking; deployed to a cloud production environment.

UAV Disaster Management System (Team Orion Forge) | *Python, Flask, OpenCV, YOLOv8* GitHub

- Collaborated on an AI-powered UAV system for disaster assessment, building computer vision modules to detect people and critical objects in drone imagery.
- Integrated YOLOv8 for real-time survivor and hazard detection; contributed to the Flask backend that processes UAV data and delivers actionable insights.
- Worked on supporting features including geo-tagging, severity analysis, SMS notifications and a rescue-team dashboard.

AI Human & Vehicle Detection System | *Python, OpenCV, YOLOv8* GitHub

- Built a real-time application using YOLOv8 to identify humans and multiple vehicle categories from live webcam streams and recorded video.
- Implemented confidence-based filtering and bounding-box visualization for surveillance, traffic monitoring and public safety use cases.

TECHNICAL SKILLS

Languages:	Python, JavaScript, C, C++, SQL, HTML5, CSS3
Frameworks & Libraries:	Flask, NumPy, OpenCV, YOLOv8, Bootstrap
Databases:	PostgreSQL, SQLite
Tools & Platforms:	Git, GitHub, VS Code, Render, Vercel, Power BI, Microsoft Excel, Figma
Core Concepts:	Machine Learning Fundamentals, Computer Vision, REST APIs, Authentication & RBAC, Database Design, Object Detection, Cloud Deployment

CERTIFICATIONS

C Programming - Infosys Springboard **2025**
The Joy of Computing Using Python **2026**

ACHIEVEMENTS

- **Competitive Programming:** Solved 600+ problems across LeetCode and CodeChef, strengthening problem-solving and algorithmic thinking.
- **Hackathons:** Active participant in hackathons and collaborative development across web development and computer vision projects.
